PEDIATRIC NEUROLOGY
Subject Index Volume 13

Acidemia, lactic, and cerebral dysgenesis, associated with X-linked PDH E1-α subunit mutations in females, 327
Acidosis
  Lactic, with mitochondrial myopathy, stroke-like episodes (MELAS) and Fanconi's syndrome, and mitochondrial DNA deletion, 69
  Renal tubular, complicated with hypokalemic periodic paralysis, 52
ACTH, effects on brain midline structures, in infants with infantile spasms, 134
Alobar holoprosencephaly with diabetes insipidus and neuronal migration disorder, 175
Angiography, mineralizing, and hydrocephalus, hypercholesterolemia, and hyperlipoprotein, 257
Antiphospholipid antibody syndrome in childhood stroke, 323
Apnea, isolated sleep, due to Chiari type I malformation and syringomyelia, 266
Apraxia, congenital ocular motor, in two siblings, 261
Arteriovenous malformation vascular steal and progressive neurologic impairment, 352
Ataxia, acute cerebellar, demonstrates abnormal lesions by MRI after varicella vaccination, 340

β-amyloid precursor protein, expression of in axons of periventricular leukomalacia brains, 161
Blood flow, cerebral, asymmetry of, an ultrasound Doppler study in preterm newborns, 319
Blood flow measurements, quantitative cerebral, using stable xenon-CT, 269
Book Reviews
  Age-Related Dopamine-Dependent Disorders: M. Segawa and Y. Nomura/Editors
  Epilepsy: 100 Elementary Principles: William H. Theodore and Roger J. Porter/Authors
  Infantile Spasms and West Syndrome: Olivier Dulac, Harry T. Chugani, and Bernardo dalla Bernardina/Editors
  Pathology of the Peripheral Nerve: Major Problems in Pathology: E. P. Richardson, Jr., U. DeGirolami/Authors
  Pediatric Neuropathology: Serge Duckett/Editor
  Problems in Pediatric Drug Therapy: Louis A. Pagliaro and Ann M. Pagliaro/Authors
  Quantitative Cerebral Blood Flow Measurements Using Stable Xenon-CT: Masamichi Tomonaga, Akira Tanaka, and Howard Yonas/Editors
  Textbook of Child Neurology: John H. Menkes/Author
Brain damage of total asphyxia type (Myers), 61
Brain, developing, a lectin and synaptophysin study, 157
Brain midline structure, effects of ACTH on, in infants with infantile spasms, 134

Calcification, early onset bilateral, and epilepsy, 80
Calcinosis, cerebral, and learning disabilities in hypoparathyroidism, cause and effect or coincidence?, 252
Carotid artery dissection, spontaneous extracranial carotid, 55
Cerebral injury, patterns of, and clinical presentation in the vascular disruptive syndrome of monozygotic twins, 279
Cerebral palsy, clues to early diagnosis of, and prospective follow-up of primitive reflex profiles in high-risk infants, 148
Chiari type I malformation and syringomyelia, with isolated sleep apnea, 266
Child neurology, textbook of, 269
Chorea, generalized, in an infant with semilobar holoprosencephaly, 355
Corpus callosum, dysgenesis of, and giant interhemispheric cysts, clinical and developmental findings, 119
Corticotropin, cerebrospinal fluid, and cortisol are reduced in infantile spasms, 108
Cysts, giant interhemispheric, and dysgenesis of the corpus callosum, clinical and developmental findings, 119

Dermatomyositis, treatment with high dose intravenous immunoglobulin, 336
Developmental disorders of the nervous system, semantic precision in describing, 178
Diabetes insipidus and neuronal migration disorder, and alobar holoprosencephaly, 175
DNA deletion, mitochondrial, with mitochondrial myopathy, lactic acidosis, and stroke-like episodes (MELAS) and Fanconi's syndrome, 69
Dopamine-dependent disorders, age-related, 181
Doppler study, ultrasound, and asymmetry of the cerebral blood flow in preterm newborns, 319
Drug therapy, pediatric, problems in, 181
Dysgenesis, cerebral, and lactic acidemia associated with X-linked PDH E1-α subunit mutations in females, 327
Dystonia
  Congenital myotonic, 85
  Generalized, and SPECT abnormalities, 5
  Hereditary torsion, and rhabdomyolysis, 83

EEG, hyperventilation activation on, and epilepsy, 42
Epilepsy
  100 elementary principles, 269
  And early onset bilateral calcifications, 80
  And hyperventilation activation on EEG recording, 42
  Complex partial status epilepticus, 137
  Intractable, flunarizine of limited value in, 143
  Unprovoked seizures and developmental disabilities, 235
  With meningomyelocele, 29
Epilepticus, status, and timing of tapering of pentobarbital therapy, 164

Fabry disease, treatment of painful crises with morphine, 268
Fanconi's syndrome, with mitochondrial DNA deletion, mitochondrial myopathy, lactic acidosis, and stroke-like episodes (MELAS), 69
Flunarizine of limited value in children with intractable epilepsy, 143

Glutaric aciduria type II, riboflavin-responsive, presenting as a leukodystrophy, 333
Guillain-Barré syndrome, and risk factors of respiratory failure, 289

Holoprosencephaly, semilobar, and generalized chorea, 355
Hopkins syndrome, and T_2-weighted-high intensity of anterior horn on spinal MR imaging, 263
HSAN IV and neurotrophins, 180
Hydrocephalus
  Neonatal posthemorrhagic, neuropathologic and immunohistochemical studies, 230
  With mineralizing angiopathy, hypercholesterolemia, and hyperlipoprotein (a), 257
Hypercholesterolemia, with hydrocephalus, mineralizing angiopathy, and hyperlipoprotein (a), 257
Hyperglycorrhachia, and neonatal segmental myoclonus, 77
Hyperlipoprotein (a), with hydrocephalus, mineralizing angiopathy, and hypercholesterolemia, 257
Hyperventilation activation on EEG recording in children with epilepsy, 42
Hypoparathyroidism, with cerebral calcinosis and learning disabilities, cause and effect or coincidence?, 252
Hypoplasia, thenar, in Klippel-Feil syndrome due to aberrant radial artery, 343

Immunoglobulin, high dose intravenous, for treatment of dermatomyositis, 336
Immunohistochemical study of myelination and oligodendrocyte in infants with periventricular leukomalacia, 296
Infantile spasms
  And cerebrospinal fluid corticotropin and cortisol reduction, 108
  And effects of ACTH on brain midline structures, 134
  And West syndrome, 86
Infarction, ischemic thalamic, 46
Ito hypomelanosis and moyamoya disease, 169

Klippel-Feil syndrome and thenar hypoplasia due to aberrant radial artery, 343
Kluver-Bucy syndrome following heat stroke, 73

Learning disabilities and cerebral calcinosis, in hypoparathyroidism, cause and effect or coincidence?, 252
Lectin and synaptophysin study of developing brain, 157
Lesions, pediatric central nervous system, and role of frameless stereotactic techniques in treatment, 209
Leukemia, acute lymphoblastic, vincristine therapy and impairment of conduction in the entire peripheral nerve, 314
Leukomalacia, periventricular, immunohistochemical study of myelination and oligodendrocyte, 296
Lupus erythematosus
  Neurologic characteristics, 198
  Systemic, and neurological manifestations, 191

Mazindol, effects in patients with Prader-Willi syndrome, 349
MELAS, and mitochondrial DNA deletion with mitochondrial myopathy, lactic acidosis, and Fanconi's syndrome, 69
Meningomyelocele, and epilepsy, 29
Mental retardation, and reduced *N*-acetylaspartate in the brain observed on in vivo proton magnetic resonance spectroscopy, 205
Mitochondrial ATPase 6 gene, novel point mutation, and bilateral striatal necrosis, 242
Morphine, as treatment for painful crises of Fabry disease, 268
Moyamoya disease and Ito hypomelanosis, 169
MRI
  And findings of Zellweger syndrome, 346
  Demonstrating abnormal lesions in acute cerebellar ataxia after varicella vaccination, 340
  Spinal, and T_2-weighted-high intensity of anterior horn in Hopkins syndrome, 263
Multiple sclerosis, recurrence and subsequent development, and optic neuritis, 293
Muscular dystrophies, congenital, 97
Myelination and oligodendrocyte, immunohistochemical study of in infants with periventricular leukomalacia, 296
Myoclonus, neonatal segmental, associated with hyperglycorrhachia, 77

N-acetylaspartate, reduced, in brain observed on in vivo magnetic resonance spectroscopy in patients with mental retardation, 205
Necrosis, bilateral striatal, with a novel point mutation in the mitochondrial ATPase 6 gene, 242
Neuritis, optic, and recurrence and subsequent development of multiple sclerosis, 293

Neuroleptic malignant syndrome in striatonigral degeneration, 255
Neuronal migration disorder, and alobar holoprosencephaly with diabetes insipidus, 175
Neuropathology, pediatric, 86
Neurotrophins and HSAN IV, 180

Oligodendrocyte and myelination, immunohistochemical study of in infant with periventricular leukomalacia, 296
Olivopontocerebellar atrophy, familial infantile, 14
Opsoclonus-myoclonus, outcome regardless of etiology, 21
Optic neuritis and recurrence and subsequent development of multiple sclerosis, 293
Orofaciodigital syndrome type with severe CNS defects, 247

P300 wave, developmental changes elicited during two different experimental conditions, 25
Paralysis, hypokalemic periodic, and renal tubular acidosis, 52
Pentobarbital therapy for status epilepticus, timing of tapering, 164
Peripheral nerve
  Entire, vincristine therapy for children with acute lymphoblastic leukemia impairs conduction in, 314
  Pathology of, 86
Periventricular leukomalacia brains, and expression of β-amyloid precursor protein in axons of, 161
Prader-Willi syndrome, and effects of mazindol, 349
Proton magnetic resonance spectroscopy, in vivo, and observation of reduced *N*-acetylaspartate in the brain of patients with mental retardation, 205

Radial artery, aberrant, and thenar hypoplasia in Klippel-Feil syndrome, 343
Reflex profiles, primitive, prospective follow-up in high-risk infants: clues to an early diagnosis of cerebral palsy, 148
Respiratory failure, risk factors of, in Guillain-Barré syndrome, 289
Rhabdomyolysis due to hereditary torsion dystonia, 83
Riboflavin-responsive glutaric aciduria type II presenting as a leukodystrophy, 333

Seizures, unprovoked, and developmental disabilities, 235
Semantic precision in describing developmental disorders of the nervous system, 178
SPECT abnormalities in generalized dystonia, 5
Status epilepticus
  And timing of tapering of pentobarbital therapy, 164
  Complex partial, 137
Stereotactic techniques, frameless, and role in treatment of pediatric central nervous system lesions, 209
Striatonigral degeneration, and neuroleptic malignant degeneration, 255
Strokes, and antiphospholipid antibody syndrome, 323
Stroke-like episodes (MELAS), with mitochondrial myopathy, lactic acidosis, and Fanconi's syndrome, with mitochondrial DNA deletion, 69
Synaptophysin and lectin study of developing brain, 157
Syringomyelia and Chiari type I malformation, with isolated sleep apnea, 266

Thenar hypoplasia in Klippel-Feil syndrome due to aberrant radial artery, 343
Tuberous sclerosis associated with histologically confirmed ocular and cerebral tumors, 172
Tumors
  CNS of pediatric patients, and neurologic and other disorders in relatives, 111
  Histologically confirmed ocular and cerebral, and tuberous sclerosis, 172
  Malignant rhabdoid, of brain and kidney, 65

Ultrasound Doppler study of asymmetry of cerebral blood flow, 319

Varicella vaccination, acute cerebellar ataxia demonstrates abnormal lesions by MRI after, 340
Vascular disruptive syndrome of monozygotic twins, patterns of cerebral injury and clinical presentation, 279
Vascular steal, arteriovenous malformation, and progressive neurologic impairment, 352
Vincristine therapy for children with acute lymphoblastic leukemia, and impairment of conduction in the entire peripheral nerve, 314
Vogt-Koyanagi-Harada syndrome, 50

West syndrome
  And infantile spasms, 86
  Outcome predicted by ictal, clinical, and electroencephalographic features?, 226

X-linked PDH E1-α subunit mutations in females, association of cerebral dysgenesis and lactic acidemia, 327

Zellweger syndrome, MRI findings, 346
